

Import your Data from iTunes

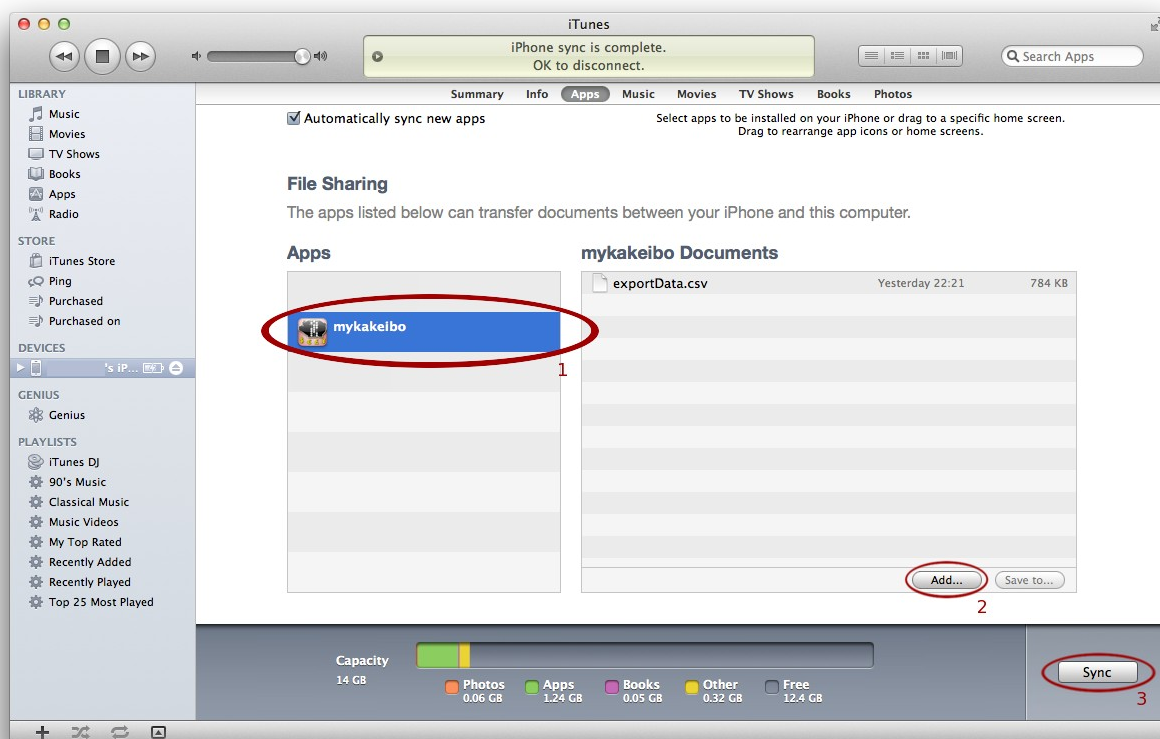

- ① Connect your iPhone (or iPad) to your computer and open iTunes.

- ② Click on your device's name in the iTunes left pane (1) . Then click the 「Apps」 link from the top menu (2) .

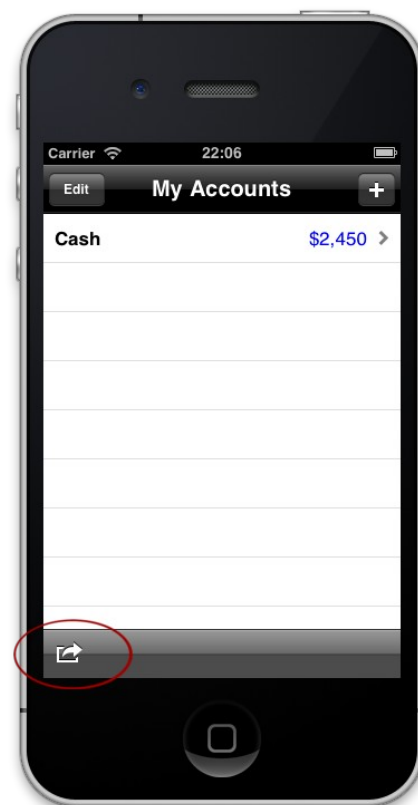

③ Scroll down to the bottom of the window.

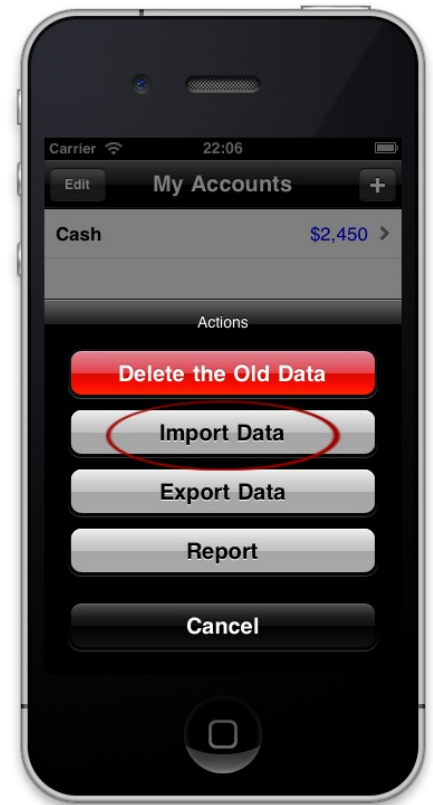

④ In the 「File Sharing」 section, select 「mykakeibo」 from the application list on the left (1). The list of available documents is displayed on the right, click the 「Add...」 button (2). Select the file to import, add it and finally click the 「Sync」 button (3).

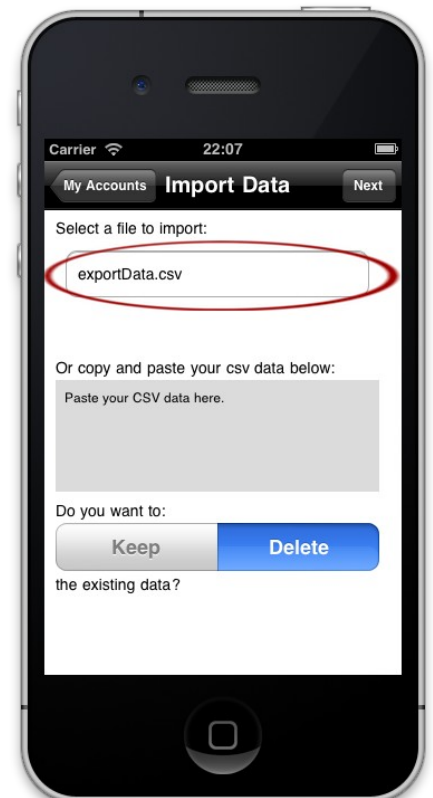

⑤ Now let's get back to the application. Tap the bottom-left button to open the menu.

⑥ Tap 「Import Data」

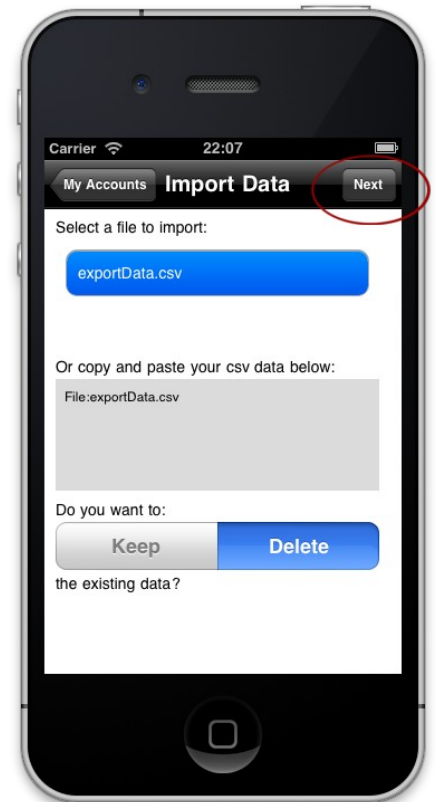

⑦ A list of available files is displayed at the top of the import screen. Select the 「exportData.csv」 file from this list. Choose if you want to keep or delete the existing data using the bottom button.

⑧ Tap the top-right 「Next」 button in order to proceed to the confirmation screen.

※ The data is not imported right away, you can confirm the number of records that are to be imported before definitely saving the data.

⑨ Confirm that the number of records correspond to what you expect. Then tap the top-right 「Save」 button to save the data.
