

## Import your Data (by e-mail)

① First of all, select and copy the data from the mail message.

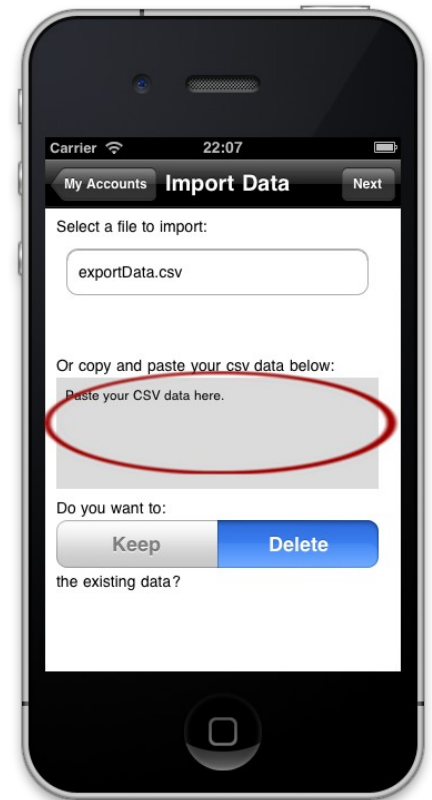

② Now let's get back to the application. Tap the bottom-left button to open the menu.

③ Tap 「Import Data」

④ Tap twice on the text field to open the context menu.

⑤ Tap the 「Paste」 button to paste the data.

Then, tap the top-right 「Next」 button in order to proceed to the confirmation screen.

※ The data is not imported right away, you can confirm the number of records that are to be imported before definitely saving the data.

⑥ Confirm that the number of records correspond to what you expect.  
Then tap the top-right 「Save」 button to save the data.
